

## OUR PHILOSOPHY

When people understand that they are a valuable contribution to the world, then they begin to see the same in others.

Being respectful, open, and coachable becomes a natural self-expression and they become a valuable resource to the company.

They are successful in managing themselves, their families, communities, society, and country. The organization not only prospers with love, respect, profit and honor... It produces a human resource that enhances harmony in the country and ultimately the World.

## QUALITY POLICIES

Exporting products that are customer specified demands straight and clear communication with a zero defect policy. UpTBB carries an ISO9001 certificate from Lloyds Register Quality Assurance since 2005.

ISO 9001:2008
